

## LSTC LIBRARY

MOBIUS, also known as Missouri Bibliographic Information User System, is a consortium of academic libraries with 68 institutions, the Missouri state library and two public libraries.

The largest single project for which MOBIUS is responsible is The Common Library Platform project. The CLP creates a virtual collection of the approximately 18 million items in the libraries of Missouri's colleges and universities and creates a single user interface that allows faculty and students to request library materials using any personal computer in any location with access to the Internet. Requested materials are delivered within three to five business days of being requested.

Other projects under consideration by MOBIUS include consortial licensing of electronic information resources such as electronic journals, cooperative collection development, and a cooperative storage facility. MOBIUS is supported by a combination of state appropriations and member fees.
